INVESTIGATIVE OPHTHALMOLOGY

Editors

Editor

BERNARD BECKER
Professor of Ophthalmology
Washington University School of Medicine
St. Louis, Missouri

Editorial Board

JAMES H. ALLEN
Professor of Ophthalmology
Tulane University School of Medicine
New Orleans, Louisiana

ELMER J. BALLINTINE
Assistant Clinical Professor of Ophthalmology
Western Reserve University School of Medicine
Cleveland, Ohio

GOODWIN M. BREININ
Professor of Ophthalmology
New York University School of Medicine
New York, New York

JOHN E. HARRIS
Professor of Ophthalmology
University of Minnesota
Minneapolis, Minnesota

MICHAEL J. HOGAN
Professor of Ophthalmology
University of California Medical School
San Francisco, California

JIN H. KINOSHITA
Assistant Professor of Biological Chemistry
Harvard Medical School
Boston, Massachusetts

V. EVERETT KINSEY
Assistant Director of Research, Kresge Eye Institute
Professor of Ophthalmic Chemistry, Wayne State University
Detroit, Michigan

PETER C. KRONFELD
Professor of Ophthalmology
University of Illinois College of Medicine
Chicago, Illinois

IRVING H. LEOPOLD
Director
Department of Ophthalmology, Mount Sinai Hospital
New York, New York

A. EDWARD MAUMENEE
Professor of Ophthalmology
Johns Hopkins University School of Medicine
Baltimore, Maryland

KENNETH N. OGLE
Professor of Physiologic Optics
Mayo Foundation, University of Minnesota
Rochester, Minnesota

ALBERT M. POTTS
Professor of Ophthalmology
University of Chicago School of Medicine
Chicago, Illinois

LUDWIG VON SALLMANN
Chief, Ophthalmology Branch
National Institute of Neurological Diseases and Blindness
Bethesda, Maryland

GEORGE K. SMELSER
Professor of Anatomy
Columbia University College of Physicians & Surgeons
New York, New York

KENNETH C. SWAN
Professor of Ophthalmology
University of Oregon School of Medicine
Portland, Oregon

LORENZ E. ZIMMERMAN
Chief, Ophthalmic Pathology Branch
Armed Forces Institute of Pathology
Washington 25, D. C.

Subject index*

A

Abstracts of papers presented at sectional meetings of Association for Research in Ophthalmology, 459
Western Section Meeting of Association for Research in Ophthalmology, 676
Acid, fatty, composition, of human retinal vitamin A ester and lipids of human retinal tissue (Futterman and Andrews), 441
Adenosinetriphosphatase, studies on sodium-potassium activated (Bonting and Becker), 523
Adrenergic and cholinergic innervation of anterior segment of rabbit eye, histochemical study (Laties and Jacobowitz), 592
Afferent course of oculorespiratory reflex of third, fourth, and sixth cranial nerves (Gay, Joffe, and Barnet), 451
Afterimages, stereoscopic localization with eyes in asymmetric convergence (Miller and Ogle), 339
Alcohol sponge, polyvinyl, response of cornea to implantation (Zigman, Carlsson, and Stone), 68
Alpha, beta, and gamma crystallins and their subgroups, methods of isolation (Spector), 182
Amblystoma punctatum and cave salamander Typhlotriton spelaeus, return of vision in larval eyes exchanged between (Stone), 555
American gray squirrel, some observations on fine structure of retinal receptors (Cohen), 198
Amino acids, labeled, incorporation into lens protein (Spector and Kinoshita), 517
Announcements, 125, 246, 354, 480, 553, 684
Anterior segment of rabbit eye, histochemical study of adrenergic and cholinergic innervation (Laties and Jacobowitz), 592
Antibiotics and antifungal agents (Leopold), 504
Anticancer agents (Newell), 489
Antifungal agents, antibiotics and (Leopold), 504
Antiviral agents (Kaufman, Maloney, and Uotila), 512
Aqueous flow determination in rabbit by means of minimal eye trauma (Dyster-Aas and Krakau), 127
into perivascular space of rabbit ciliary body (Fowlks and Havener), 374
humor flow, inhibition of enzyme activity and, in rabbit eye after intravitreal injection of ouabain (Bonting and Becker), 523
rabbit anterior chamber, pH-temperature coefficient (Schwartz), 96
outflow facility in monkeys and effect of topical corticoids (Armaly), 534
Arteriovenous oxygen difference across uveal tract of dog eye (Elgin), 417
Association for Research in Ophthalmology
Program for June National Meeting, 242
Program for December National Meeting, 548
Asymmetric convergence, stereoscopic localization of afterimages with eyes in (Miller and Ogle), 339
Autonomic ocular drugs (Shaffer), 498

B

Beta, alpha, and gamma crystallins, and their subgroups, methods of isolation (Spector), 182
Blood flow, choroidal, retinal and, determined with krypton-85 anesthetized animals (Friedman, Kopald, and Smith), 539
Blood flow—Cont'd
uveal, determined by nitrous oxide method (Pilkerton, Bulle, and O'Rouke), 227
vessels and glia of retina, electron microscopic studies of nucleoside phosphatase activity in (Marchesi, Sears, and Barrnett), 1
of humans and rhesus monkeys studied with Cartesian diver, metabolism of retinal (Howard and Sears), 432
Book reviews, 241, 479
Bovine, rabbit, and human lens, phospholipids (Feldman et al.), 194
Breathing increased carbon dioxide and oxygen concentrations, retinal vascular response to (Frayser and Hickam), 427

C

Carbon dioxide and oxygen concentrations, retinal vascular response to breathing increased (Frayser and Hickam), 427
Cardiovascular renal agents as they impinge on ophthalmic practice (Harris), 481
Carriers of color vision defects, so-called normal, hue discrimination defect in (Krill and Schneiderman), 445
heteroxygote protan, red-light absolute threshold in (Krill and Beutler), 107
Cartesian diver, metabolism of retinal blood vessels of humans and rhesus monkeys studied with (Howard and Sears), 432
Cataract, galactose, hydration of lens during development (Kinoshita and Merola), 577
Catechol-O-methyl transferase and monoamine oxidase activity in ocular tissues of albino rabbits (Waltman and Sears), 601
Cell division, DNA synthesis and, in cultured ocular lens (Harding and Thayer), 302
proliferation in lens epithelium, influence of Myleran on (Grimes, von Sallmann, and Frichette), 566

*February, pp. 1-126; April, pp. 127-246; June, pp. 247-354; August, pp. 355-480; October, pp. 481-554; December, pp. 555-696.

Cercopithecus ethiops and Macaca irus, comparative studies of effect of pilocarpine on pupil and on refraction in two species of monkey (Törnqvist), 388
Cholinergic innervation, adrenergic and, of anterior segment of rabbit eye, histochemical study (Laties and Jacobowitz), 592
Chorioretinal vascular occlusions with latex spheres (Gay, Goldor, and Smith), 647
Chorioretinitis, focal, produced by ultrasound (Purnell et al.), 657
Choroidal blood flow, retinal and, determined with krypton-85 anesthetized animals (Friedman, Kopald, and Smith), 539
Chronic simple glaucoma, concept of pathogenesis, observations on drainage angle in man and rhesus monkey (Fine), 609
Ciliary body (cyclocryotherapy), effect of freezing on (Polack and de Roetth), 164
rabbit, aqueous flow into, perivascular space (Fowlks and Havener), 374
processes, rabbit eye, direct observation of secretory pumping in vitro (Berggren), 266
Color vision defects, hue discrimination defect in so-called normal carriers (Krill and Schneiderman), 445
Conjunctiva, human, fine structure of, in perilimbal zone (Wanko, Lloyd, and Matthews), 285
Contrast, simultaneous visual, effect of hypoxia on (Bridges and Kolder), 119
Convergence, asymmetric, stereoscopic localization of afterimages with eyes in (Miller and Ogle), 339
Cornea, fine structure of, in Fuchs' endothelial dystrophy (Kayes and Holmberg), 47
lattice dystrophy of, stromal lesion in (McTigue and Fine), 355
response to implantation of polyvinyl alcohol sponge (Zigman, Carlsson, and Stone), 68
Corneal repair, study of enzyme activity in (Kaufman, Capella, and Robbins), 34
Cortical potentials, factors affecting visually evoked, such as impaired vision of varying etiology (Copenhaver and Perry), 665
Corticoids, topical, aqueous outflow facility in monkeys and, effect of (Armaly), 534
Corticosteroids, side effects (Becker), 492
Cranial nerves, third, fourth, and sixth, afferent course of oculorespiratory reflex (Gay, Joffe, and Barnet), 451
Crystalline lens, studies on. XIII. Kinetics of potassium transport (Kinsey and McLean), 585
Crystallins, alpha, beta, and gamma, and their subgroups, methods of isolation (Spector), 182
Cultured ocular lens, DNA synthesis and cell division in (Harding and Thayer), 302
Cyclocryotherapy, effect of freezing on ciliary body (Polack and de Roetth), 164

D

Dehydrogenase, lactic, of lens, isolation and characterization of another isozyme (Fowlks, Gingrich, and Eldridge), 171
Discrimination defect, hue, in so-called normal carriers of color vision defects (Krill and Schneiderman), 445
DNA synthesis and cell division in cultured ocular lens (Harding and Thayer), 302
Dog eye, arteriovenous oxygen difference across uveal tract (Elgin), 417
Dose-effect relationships as aid in evaluation of ocular hypotensive drugs (Kronfeld), 258
Drainage angle in man and rhesus monkey: observations on, concept of pathogenesis of chronic simple glaucoma (Fine), 609
Drugs, autonomic ocular (Shaffer), 498
ocular hypotensive, evaluation of, dose-effect relationships as aid in (Kronfeld), 258
Dystrophy, Fuchs' endothelial, fine structure of cornea in (Kayes and Holmberg), 47
lattice, of cornea, stromal lesion in (McTigue and Fine), 355
myotonic, eye movements in (von Noorden, Thompson, and Van Allen), 314
pupil in (Thompson, Van Allen, and von Noorden), 325

E

Elastic components of trabeculae and scleral spur of human eye, light and electron microscopy (Iwamoto), 144
tissue of primate trabecular meshwork (Yamashita and Rosen), 85
Electron microscopic studies of nucleoside phosphatase activity in blood vessels and glia of retina (Marchesi, Sears, and Barrnett), 1
microscopy, light and, of presumed elastic components of trabeculae and scleral spur of human eye (Iwamoto), 144
Endothelial dystrophy, Fuchs', fine structure of cornea in (Kayes and Holmberg), 47
Enzyme activity in corneal repair, study (Kaufman, Capella, and Robbins), 34
inhibition of, and aqueous humor flow in rabbit eye after intravitreal injection of ouabain (Bonting and Becker), 523
Epithelium, lens, influence of Myleran on cell proliferation in (Grimes, von Sallmann, and Frichette), 566
Ester and lipids of human retinal tissue, fatty acid composition of human retinal vitamin A (Futterman and Andrews), 441

Eye, dog, arteriovenous oxygen difference across uveal tract (Elgin), 417
human, light and electron microscopy of presumed elastic components of trabeculae and scleral spur (Iwamoto), 144
movements in myotonic dystrophy (von Noorden, Thompson, and Van Allen), 314
rabbit, ciliary processes, direct observation of secretory pumping in vitro (Berggren), 266
after intravitreal injection of ouabain, inhibition of enzyme activity and aqueous humor flow in (Bonting and Becker), 523
histochemical study of adrenergic and cholinergic innervation of anterior segment (Laties and Jacobowitz), 592
trabecular effect of noradrenalin in (Sears and Sherk), 157
rat, developmental histochemistry (Berkow and Patz), 22
trauma, minimal, aqueous flow determination in rabbit by means of (Dyster-Aas and Krakau), 127
Eyes in asymmetric convergence, stereoscopic localization of afterimages with (Miller and Ogle), 339
larval, return of vision in, exchanged between Amblystoma punctatum and cave salamander Typhlotriton spelaeus (Stone), 555

F

Facility of outflow, effect of tonography on (Moses), 606
Fatty acid composition of human retinal vitamin A ester and lipids of human retinal tissue (Futterman and Andrews), 441
Fine structure of cornea in Fuchs' endothelial dystrophy (Kayes and Holmberg), 47
of human conjunctiva in perilimbal zone (Wanko, Lloyd, and Matthews), 285
Fine structure—Cont'd
of retinal receptors of American gray squirrel, some observations on (Cohen), 198
Flow, aqueous, into perivascular space of rabbit ciliary body (Fowlks and Havener), 374
Focal chorioretinitis produced by ultrasound (Purnell et al.), 657
Freezing, effect on ciliary body (cyclocryotherapy) (Polack and de Roetth), 164
Fuchs' endothelial dystrophy, fine structure of cornea in (Kayes and Holmberg), 47

G

Galactose cataract, hydration of lens during development (Kinoshita and Merola), 577
Gamma crystallins, alpha, beta, and, and their subgroups, methods of isolation (Spector), 182
globulin in experimental herpes simplex keratitis (Hudnell and Osterhout), 366
Glaucoma, chronic simple, concept of pathogenesis, observations on drainage angle in man and rhesus monkey (Fine), 609
Glia of retina, blood vessels and, electron microscopic studies of nucleoside phosphatase activity in (Marchesi, Sears, and Barrnett), 1
Globulin, gamma, in experimental herpes simplex keratitis (Hudnell and Osterhout), 366
Glycolysis, uveal tissue respiration and, in living experimental animals (Pilkerton, Bulle, and O'Rourke), 237
Gradient, ocular temperature, effect of lid closure upon (Schwartz), 100

H

Hemodialysis, changes in intraocular pressure during (Sitprija, Holmes, and Ellis), 273
Herpes simplex keratitis, experimental, gamma globulin in (Hudnell and Osterhout), 366
Heterozygote protan carriers, red-light absolute threshold in (Krill and Beutler), 107
Histochemical study of adrenergic and cholinergic innervation of anterior segment of rabbit eye (Laties and Jacobowitz), 592
Histochemistry of rat eye, developmental (Berkow and Patz), 22
Hue discrimination defect in so-called normal carriers of color vision defects (Krill and Schneiderman), 445
Human conjunctiva, fine structure of, in perilimbal zone (Wanko, Lloyd, and Matthews), 285
eye, light and electron microscopy of presumed elastic components of trabeculae and scleral spur (Iwamoto), 144
lens, bovine, rabbit, and, phospholipids (Feldman et al.), 194
retinal tissue, lipids of, human retinal vitamin A ester and, fatty acid composition (Futterman and Andrews), 441
vitamin A ester and lipids of human retinal tissue, fatty acid composition (Futterman and Andrews), 441
Humans and rhesus monkeys studied with Cartesian diver, metabolism of retinal blood vessels (Howard and Sears), 432
Humor flow, aqueous, inhibition of enzyme activity and, in rabbit eye after intravitreal injection of ouabain (Bonting and Becker), 523
rabbit anterior chamber aqueous, pH-temperature coefficient (Schwartz), 96
Hydration of lens during development of galactose cataract (Kinoshita and Merola), 577
Hypotensive drugs, ocular, evaluation of dose-effect relationships as aid in (Kronfeld), 258

Hypoxia, effect on simultaneous visual contrast (Bridges and Kolder), 119

I

Infusion, constant pressure, simultaneous measurement of changing intraocular pressure and outflow facility in vervet monkey by (Bárány), 135
Inhibition of enzyme activity and aqueous humor flow in rabbit eye after intravitreal injection of ouabain (Bonting and Becker), 523
Intraocular pressure, changes in, during hemodialysis (Sitprija, Holmes, and Ellis), 273
changing, and outflow facility in vervet monkey by constant pressure infusion, simultaneous measurement (Bárány), 135
Intravitreal injection of ouabain, inhibition of enzyme activity and aqueous humor flow in rabbit eye after (Bonting and Becker), 523
Isozyme, isolation and characterization of another, lactic dehydrogenase of lens (Fowlks, Gingrich, and Eldridge), 171
Ivalon, response of cornea to implantation (Zigman, Carlsson, and Stone), 68

K

Keratitis, experimental herpes simplex, gamma globulin in (Hudnell and Osterhout), 366
Kinetics of potassium transport, studies on crystalline lens. XIII (Kinsey and McLean), 585
Krypton-85 anesthetized animals, retinal and choroidal blood flow determined with (Friedman, Kopald, and Smith), 539

L

Labeled amino acids, incorporation into lens protein (Spector and Kinoshita), 517
Lactic dehydrogenase of lens, isolation and characterization of another isozyme (Fowlks, Gingrich, and Eldridge), 171
Larval eyes exchanged between Amblystoma punctatum and cave salamander Typhlotriton spelaeus, return of vision in (Stone), 555
Latex spheres, chorioretinal vascular occlusions with (Gay, Goldor, and Smith), 647
Lattice dystrophy of cornea, stromal lesion in (McTigue and Fine), 355
Lens, crystalline, studies on. XIII. Kinetics of potassium transport (Kinsey and McLean), 585
cultured ocular, DNA synthesis and cell division in (Harding and Thayer), 302
epithelium, influence of Myleran on cell proliferation in (Grimes, von Sallmann, and Frichette), 566
human, bovine, rabbit, and, phospholipids (Feldman et al.), 194
hydration of, during development of galactose cataract (Kinoshita and Merola), 577
lactic dehydrogenase of, isolation and characterization of another isozyme (Fowlks, Gingrich, and Eldridge), 171
metabolism in vivo, study (Garcia, Aaberg, and Kupfer), 384
protein, incorporation of labeled amino acids into (Spector and Kinosita), 517
Lesion, stromal, in lattice dystrophy of cornea (McTigue and Fine), 355
Lid closure, effect upon ocular temperature gradient (Schwartz), 100
Light and electron microscopy of presumed elastic components of trabeculae and scleral spur of human eye (Iwamoto), 144
red, absolute threshold in heterozygote protan carriers (Krill and Beutler), 107
Lipids of human retinal tissue, human retinal vitamin A ester and, fatty acid composition (Futterman and Andrews), 441

M

Macaca irus, Cercopithecus ethiops and, comparative studies of effect of pilocarpine on pupil and on refraction in two species of monkey (Törnqvist), 388
Measurement, simultaneous, of changing intraocular pressure and outflow facility in vervet monkey by constant pressure infusion (Bárány), 135
Melanin, uveal, further studies concerning accumulation of polycyclic compounds on (Potts), 399
Meshwork, primate trabecular, elastic tissue (Yamashita and Rosen), 85
Metabolism, lens, in vivo, study (Garcia, Aaberg, and Kupfer), 384
of retinal blood vessels of humans and rhesus monkeys studied with Cartesian diver (Howard and Sears), 432
Microcirculation, retinal, in vivo (Friedman, Smith, and Kuwabara), 217
Microscopic studies, electron, of nucleoside phosphatase activity in blood vessels and glia of retina (Marchesi, Sears, and Barrnett), 1
Microscopy, light and electron, of presumed elastic components of trabeculae and scleral spur of human eye (Iwamoto), 144
Monkey, two species (Cercopithecus ethiops and Macaca irus), comparative studies of effect of pilocarpine on pupil and on refraction in (Törnqvist), 388
vervet, simultaneous measurement of changing intraocular pressure and outflow facility in, by constant pressure infusion (Bárány), 135
Monkeys, aqueous outflow facility in, and effect of topical corticoids (Armaly), 534
rhesus, humans and, metabolism of retinal blood vessels, studied with Cartesian diver (Howard and Sears), 432

Monkeys—Cont'd
rhesus, drainage angle in man and, observations on, concept of pathogenesis of chronic simple glaucoma (Fine), 609
Monoamine oxidase activity, catechol-O-methyl transferase and, in ocular tissues of albino rabbits (Waltman and Sears), 601
Myleran, influence on cell proliferation in lens epithelium (Grimes, von Sallmann, and Frichette), 566
Myotonic dystrophy, eye movements in (von Noorden, Thompson, and Van Allen), 314
pupil in (Thompson, Van Allen, and von Noorden), 325

N

Nerves, third, fourth, and sixth cranial, afferent course of oculorespiratory reflex (Gay, Joffe, and Barnet), 451
Nitrous oxide method, uveal blood flow determined by (Pilkerton, Bulle, and O'Rourke), 227
Noradrenalin, trabecular effect in rabbit eye (Sears and Sherk), 157
Nucleoside phosphatase activity in blood vessels and glia of retina, electron microscopic studies (Marchesi, Sears, and Barrnett), 1

O

Occlusions, chorioretinal vascular, with latex spheres (Gay, Goldor, and Smith), 647
Ocular drugs, autonomic (Shaffer), 498
hypotensive drugs, evaluation of, dose-effect relationships as aid in (Kronfeld), 258
lens, cultured, DNA synthesis and cell division in (Harding and Thayer), 302
temperature gradient, effect of lid closure upon (Schwartz), 100
tissues of albino rabbits, catechol-O-methyl transferase and monoamine oxidase activity in (Waltman and Sears), 601
Oculorespiratory reflex of third, fourth, and sixth cranial nerves, afferent course (Gay, Joffe, and Barnet), 451
Ophthalmic practice, cardiovascular renal agents as they impinge on (Harris), 481
Ouabain, intravitreal injection of, inhibition of enzyme activity and aqueous humor flow in rabbit eye after (Bonting and Becker), 523
Outflow, effect of tonography on facility (Moses), 606
facility, aqueous, in monkeys and effect of topical corticoids (Armaly), 534
simultaneous measurement of changing intraocular pressure and, in vervet monkey by constant pressure infusion (Bárány), 135
Oxygen concentrations, increased, carbon dioxide and, retinal vascular response to breathing (Frayser and Hickam), 427
difference, arteriovenous, across uveal tract of dog eye (Elgin), 417

P

Pathogenesis of chronic simple glaucoma, concept of observations on drainage angle in man and rhesus monkey (Fine), 609
Perilimbal zone, fine structure of human conjunctiva in (Wanko, Lloyd, and Matthews), 285
Perivascular space of rabbit ciliary body, aqueous flow into (Fowlks and Havener), 374
Phosphatase activity, nucleoside, in blood vessels and glia of retina, electron microscopic studies (Marchesi, Sears, and Barrnett), 1
Phospholipids of bovine, rabbit, and human lens (Feldman et al.), 194
pH-temperature coefficient of rabbit anterior chamber aqueous humor (Schwartz), 96
Pigment, uveal, reaction of, in vitro with polycyclic compounds (Potts), 405
Pilocarpine, effect on pupil and on refraction in two species of monkey (Cercopithecus ethiops and Macaca irus), comparative studies (Törnqvist), 388
Polycyclic compounds, accumulation of, on uveal melanin, further studies concerning (Potts), 399
reaction of uveal pigment in vitro with (Potts), 405
Potassium, sodium-, activated adenosinetriphosphatase, studies on (Bonting and Becker), 523
transport, kinetics of. XIII. Studies on crystalline lens (Kinsey and McLean), 585
Pressure, intraocular, during hemodialysis, changes in (Sitprija, Holmes, and Ellis), 273
Primate trabecular meshwork, elastic tissue (Yamashita and Rosen), 85
Proctor Award Lecture: Dose-effect relationships as aid in evaluation of ocular hypotensive drugs (Kronfeld), 258
Proctor Medal of Association for Research in Ophthalmology, presentation to Peter C. Kronfeld (Swan), 248
Proctor Medal Award, remarks made on acceptance (Kronfeld), 250
Protan carriers, heterozygote, red-light absolute threshold in (Krill and Beutler), 107
Protein, lens, incorporation of labeled amino acids into (Spector and Kinoshita), 517
Pupil, effect of pilocarpine on, and on refraction in two species of monkey (Cercopithecus ethiops and Macaca irus), comparative studies (Törnqvist), 388
in myotonic dystrophy (Thompson, Van Allen, and von Noorden), 325

R

Rabbit anterior chamber aqueous humor, pH-temperature coefficient (Schwartz), 96

Rabbit—Cont'd
aqueous flow determination in, by means of minimal eye trauma (Dyster-Aas and Krakau), 127
bovine, and human lens, phospholipids (Feldman et al.), 194
ciliary body, perivascular space of, aqueous flow into (Fowlks and Havener), 374
eye after intravitreal injection of ouabain, inhibition of enzyme activity and aqueous humor flow in (Bonting and Becker), 523
ciliary processes, direct observation of secretory pumping in vitro (Berggren), 266
histochemical study of adrenergic and cholinergic innervation of anterior segment (Laties and Jacobowitz), 592
trabecular effect of noradrenalin in (Sears and Sherk), 157
Rabbits, albino, catechol-O-methyl transferase and monoamine oxidase activity in ocular tissues (Waltman and Sears), 601
Rat eye, developmental histochemistry (Berkow and Patz), 22
Receptors, retinal, of American gray squirel, some observations on fine structure (Cohen), 198
Red-light absolute threshold in heterozygote protan carriers (Krill and Beutler), 107
Reflex, oculorespiratory, of third, fourth, and sixth cranial nerves, afferent course (Gay, Joffe, and Barnet), 451
Refraction, comparative studies of effect of pilocarpine on pupil and on, in two species of monkey (Cercopithecus ethiops and Macaca irus) (Törnqvist), 388
Renal agents, cardiovascular, as they impinge on ophthalmic practice (Harris), 481
Respiration, uveal tissue, and glycolysis in living experimental animals (Pilkerton, Bulle, and O'Rourke), 237
Retina, glia of, blood vessels and, electron microscopic studies of nucleoside phosphatase activity in (Marchesi, Sears, and Barrnett), 1
Retinal blood vessels of humans and rhesus monkeys studied with Cartesian diver, metabolism (Howard and Sears), 432
and choroidal blood flow determined with krypton-85 anesthetized animals (Friedman, Kopald, and Smith), 539
microcirculation in vivo (Friedman, Smith, and Kuwabara), 217
receptors of American gray squirrel, some observations on fine structure (Cohen), 198
tissue, lipids of human, human retinal vitamin A ester and, fatty acid composition (Futterman and Andrews), 441
vascular response to breathing increased carbon dioxide and oxygen concentrations (Frayser and Hickam), 427
vitamin A ester, human, and lipids of human retinal tissue, fatty acid composition (Futterman and Andrews), 441
Rhesus monkey, man and, observations on drainage angle in, concept of pathogenesis of chronic simple glaucoma (Fine), 609
monkeys, humans and, studied with Cartesian diver, metabolism of retinal blood vessels (Howard and Sears), 432

S

Salamander, cave, Typhlotriton spelaeus, Amblystoma punctatum and, return of vision in larval eyes exchanged between (Stone), 555
Scleral spur of human eye, trabeculae and, light and electron microscopy of presumed elastic components (Iwamoto), 144
Secretory pumping in vitro of rabbit eye ciliary processes, direct observation (Berggren), 266
Simultaneous visual contrast, effect of hypoxia on (Bridges and Kolder), 119
Sodium-potassium activated adenosinetriphosphatase, studies on (Bonting and Becker), 523
Sponge, polyvinyl alcohol, response of cornea to implantation (Zigman, Carlsson, and Stone), 68
Spur, scleral, trabeculae and, light and electron microscopy of presumed elastic components (Iwamoto), 144
Stereoscopic localization of afterimages with eyes in asymmetric convergence (Miller and Ogle), 339
Stromal lesion in lattice dystrophy of cornea (McTigue and Fine), 355
Structure, fine, of cornea in Fuchs' endothelial dystrophy (Kayes and Holmberg), 47
of human conjunctiva in perilimbal zone (Wanko, Lloyd, and Matthews), 285
of retinal receptors of American gray squirrel, some observations on (Cohen), 198

T

Temperature gradient, ocular, effect of lid closure upon (Schwartz), 100
pH-, coefficient of rabbit anterior chamber aqueous humor (Schwartz), 96
Therapy, symposium on complications and management, 481
Threshold, red-light absolute, in heterozygote protan carriers (Krill and Beutler), 107
Tissue, elastic, of primate trabecular meshwork (Yamashita and Rosen), 85
lipids of human retinal, human retinal vitamin A ester and, fatty acid composition (Futterman and Andrews), 441
respiration, uveal, and glycolysis in living experimental animals (Pilkerton, Bulle, and O'Rourke), 237
Tissues, ocular, of albino rabbits, catechol-O-methyl transferase and monoamine oxidase activity in (Waltman and Sears), 601

Tonography, effect on facility of outflow (Moses), 606
on consistency of (Armaly), 77
Topical corticoids, effect of, aqueous outflow facility in monkeys and (Armaly), 534
Trabeculae and scleral spur of human eye, light and electron microscopy of presumed elastic components (Iwamoto), 144
Trabecular effect of noradrenalin in rabbit eye (Sears and Sherk), 157
meshwork, primate, elastic tissue (Yamashita and Rosen), 85
Transferase, catechol-O-methyl, and monoamine oxidase activity in ocular tissues of albino rabbits (Waltman and Sears), 601
Trauma, eye, minimal, aqueous flow determination in rabbit by means of (Dyster-Aas and Krakau), 127
Typhlotriton spelaeus, cave salamander, Amblystoma punctatum and, return of vision in larval eyes exchanged between (Stone), 555

U

Ultrasound, focal chorioretinitis produced by (Purnell et al.), 657
Uveal blood flow determined by nitrous oxide method (Pilkerton, Bulle, and O'Rourke), 227
melanin, further studies concerning accumulation of polycyclic compounds on (Potts), 399
pigment, reaction, in vitro with polycyclic compounds (Potts), 405
tissue respiration and glycolysis in living experimental animals (Pilkerton, Bulle, and O'Rourke), 237
tract of dog eye, arteriovenous oxygen difference across (Elgin), 417

V

Vascular occlusions, chorioretinal, with latex spheres (Gay, Goldor, and Smith), 647
response, retinal, to breathing increased carbon dioxide and oxygen concentrations (Frayser and Hickam), 427
Vervet monkey, simultaneous measurement of changing intraocular pressure and outflow facility in, by constant pressure infusion (Bárány), 135
Vision defects, color, hue discrimination defect in so-called normal carriers (Krill and Schneiderman), 445
impaired, of varying etiology, factors affecting visually evoked cortical potentials such as (Copenhaver and Perry), 665
return in larval eyes exchanged between Amblystoma punctatum and cave salamander Typhlotriton spelaeus (Stone), 555
Visual contrast, simultaneous, effect of hypoxia on (Bridges and Kolder), 119
Vitamin A ester and lipids of human retinal tissue, fatty acid composition of human retinal (Futterman and Andrews), 441
